1. Prerequisites for Installation

This document is for Installation/Upgrade of WFM (Winshuttle Function Module) v20.2.8
To be used by customers to Install/Upgrade FM side functionality v20.2.8 for Studio (comprising of Transaction, Query, Runner, Direct)

Ensure that any old Transaction FM v10.5 or lower is removed – refer folder ../RemoveOldTransactionFMs/

Ensure that the system does not have any prior version of Query (WINSHTLQ component) server side - if WINSHTLQ exists, then please use the document in the “Upgrade” folder to implement FM side functionality v20.2.8 for Studio (comprising of Transaction, Query, Runner, Direct)

1. Ensure that you import the current SPAM/SAINT update (version 0053 or later for SAP NetWeaver 2004s). To confirm the version, compare the short text of the last imported SPAM/SAINT update (SAPKD*) with the short text of the SPAM/SAINT update in the SAP Service Marketplace. If the SAP Service Marketplace contains a more current version, import the new SPAM/SAINT update. For more information, see Note [19466](#).
2. The transport tool tp has at least Version 380.07.22 and You use a kernel with at least Release 7.20. The transport tool R3trans has at least the version from AUG/06/2013.
3. Ensure that your system has 5MB available in the transport directory.

2. Prepare the installation/Upgrade

To load the package with the add-on installation tool from the application server

1. Log on as user:
<sid>adm to UNIX
<SID>OFR to AS/400 (IBM eServer iSeries)
<SID>adm to Windows NT
2. Change to the transport directory of your SAP System. The transport directory also appears under the name Transaction AL11 under DIR_TRANS.
3. Change to the EPS directory, and then change to the “in” directory.
4. Extract SAR Files given In WNCNNxIU.SAR Format (where ‘**NNx**’ represent the Winshuttle Function Module Version, with ‘**NN**’ being 2-digit number and ‘**x**’ being an Alphabet) with latest version of SAPCAR tool, it extracts into a <>.PAT file. Copy the <>.PAT file to the “in” directory.

Reference Table for Released Winshuttle SAR File Number for Respective SAP System

| WNCNNxIU.SAR version | SAP System Version |
|----------------------|------------------------------|
| WNC11DIU.SAR | ERP6-70x-731 or ERP6-740-750 |
| WNC71DIU.SAR | ERP6-730 |
| WNC41DIU.SAR | ERP6-710-711 |
| WNC91DIU.SAR | NW(APO)-70x-731-740-750 |
| WNC75DIU.SAR | S4 HANA-1610-751 |
| WNC76DIU.SAR | S4 HANA-1709-752 |
| WNC77DIU.SAR | S4 HANA-1809-753 |
| WNC96DIU.SAR | NW 740-750-751-752-753 |
| WNC78DIU.SAR | S4 HANA-1909-754 |
| WNC82CIU.SAR | S4 HANA-2020-755 |
| WNC83BIU.SAR | S4 HANA-2021-756 |

To load the package directly from front-end

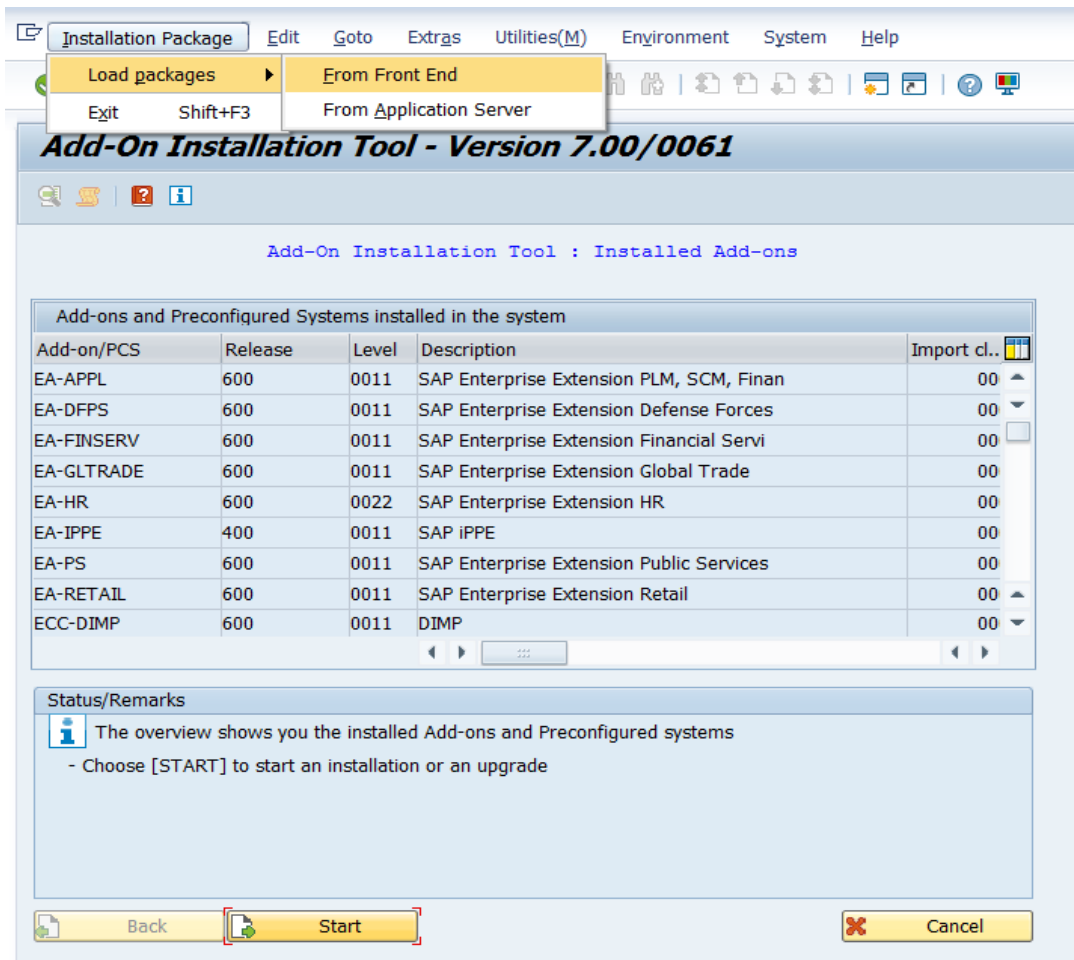

Ensure that you have the latest version of the SAPCAR tool available in the sap server.

3. Execute the installation/Upgrade

1. Log on to your SAP System in client 000 as a user with SAP_ALL-authorization. Do NOT use user SAP* or DDIC.

To start the installation/Upgrade, call the add-on installation tool transaction code SAINT

Winshuttle SAP Add-On Component Installation/Upgrade Document

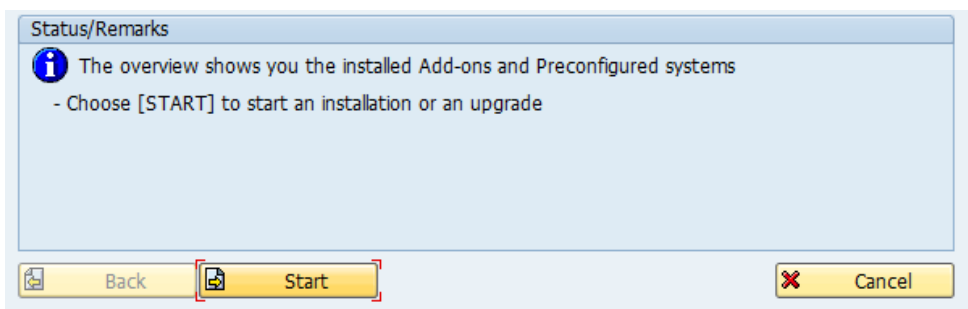

In SAINT from Menu

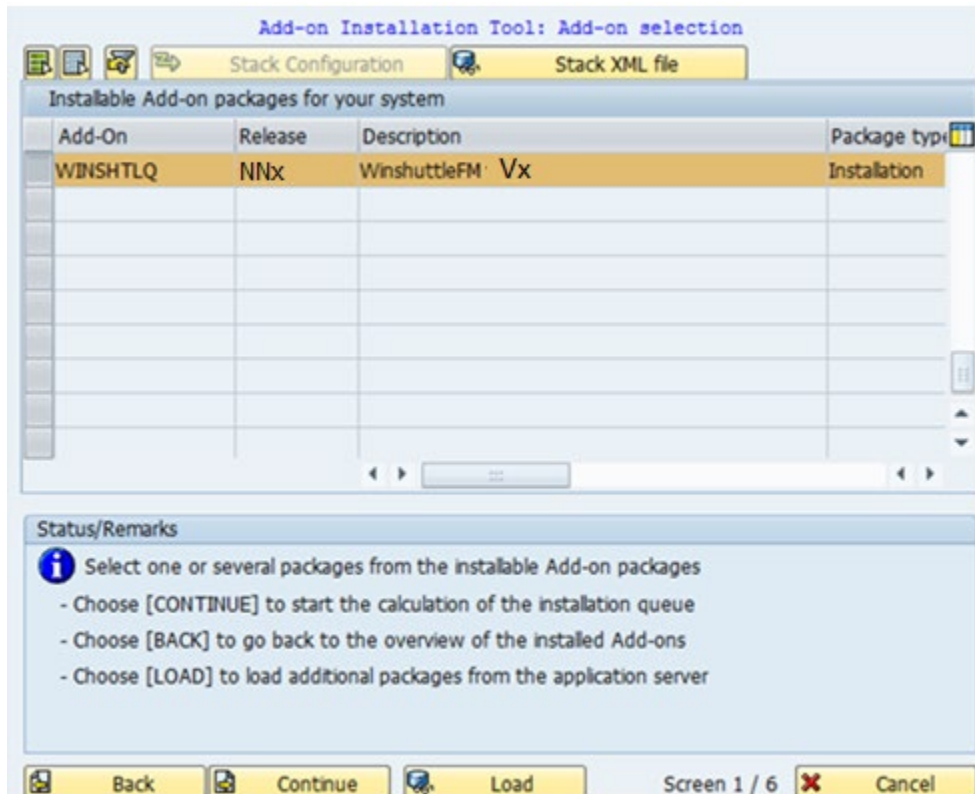

Installation Package > Load Packages > Front End

Upload file WNCNNxIU.SAR
Decompress to < >.PAT file

After upload and decompress.

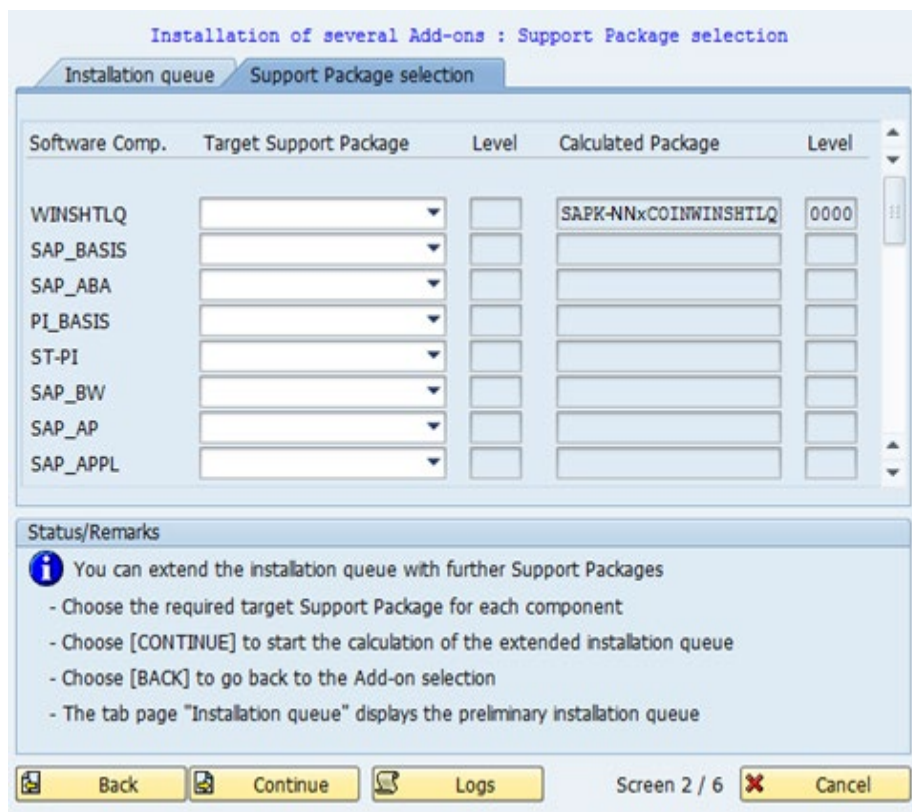

Click **Start**.

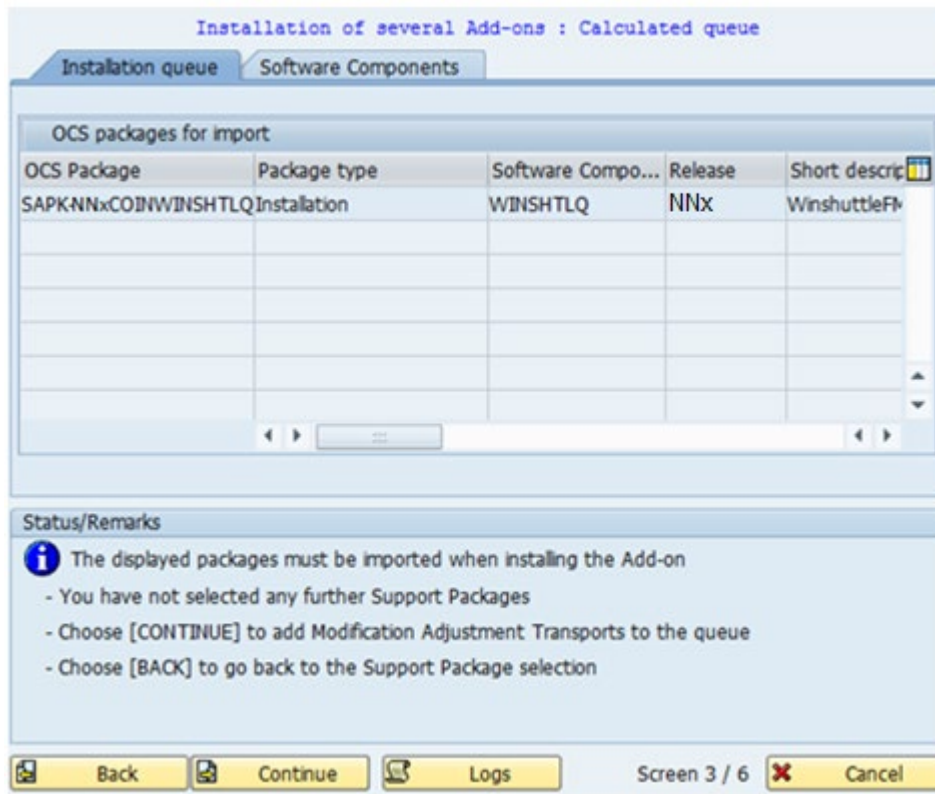

Vx = 20.2.8

Select the **Add-on** and click **Continue**.

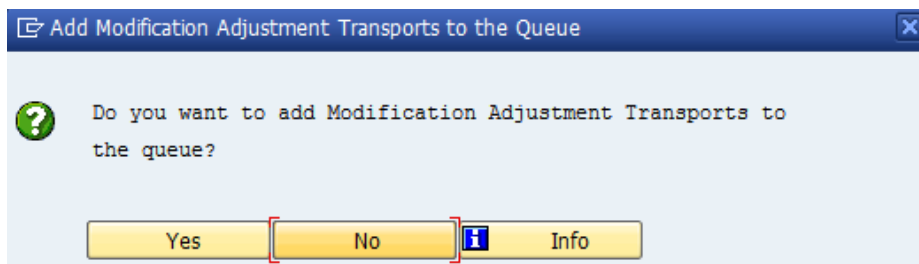

Winshuttle SAP Add-On Component Installation/Upgrade Document

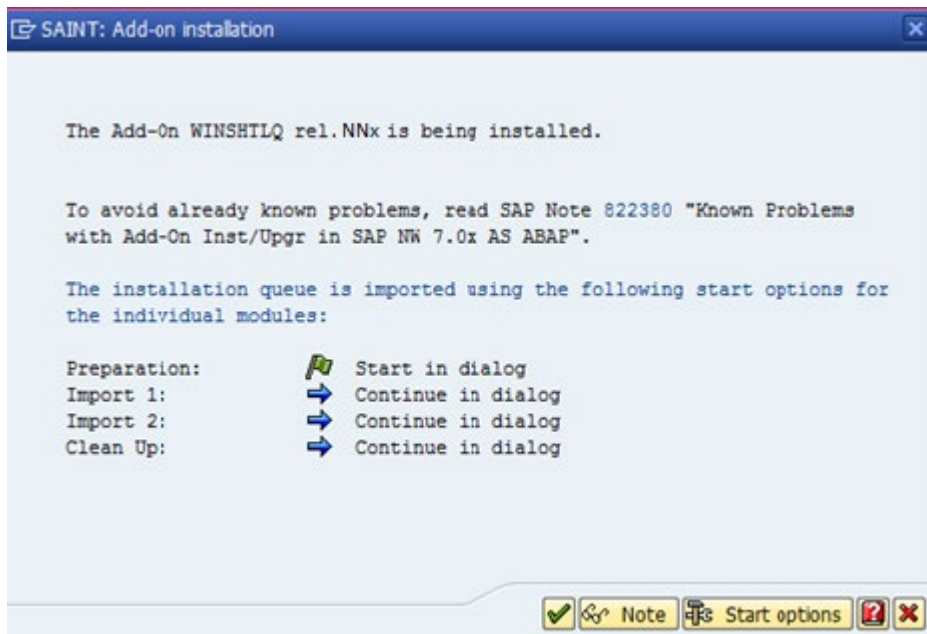

Click **Continue**.

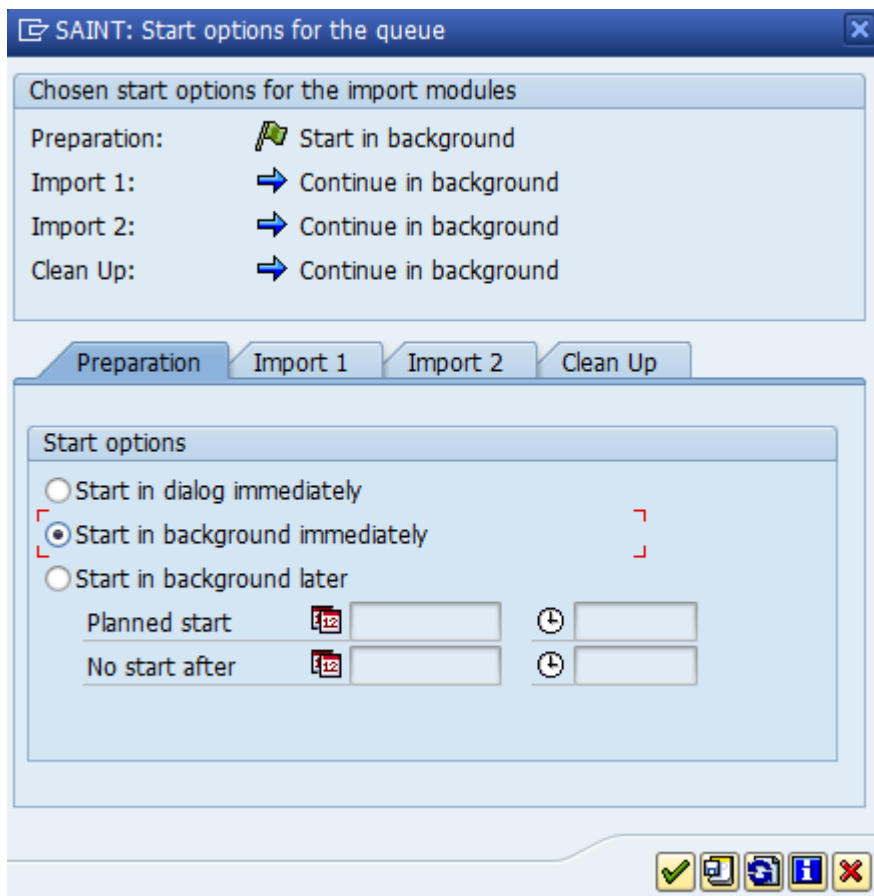

Click **Continue**.

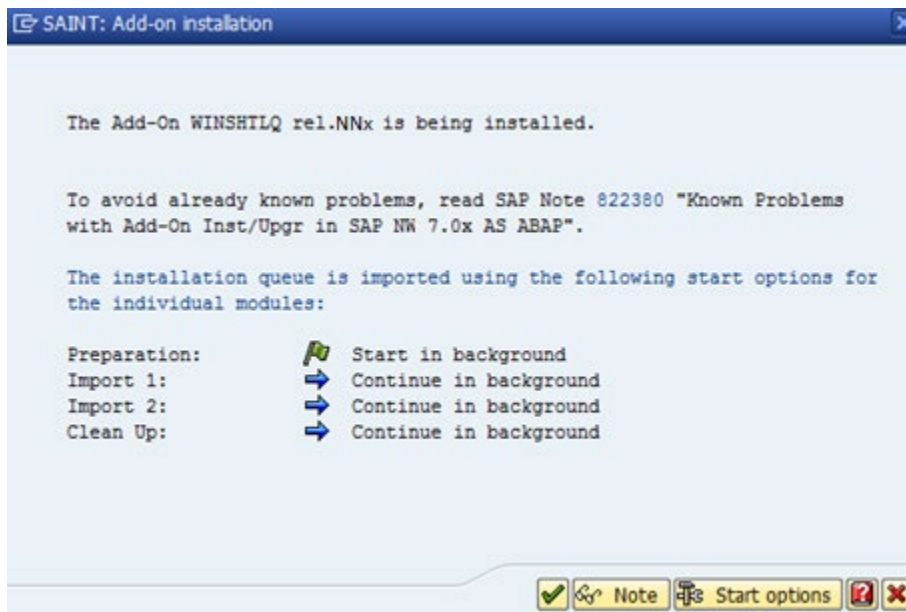

If this window appears, this component has an independent and unique namespace assigned by SAP. Click **No**.

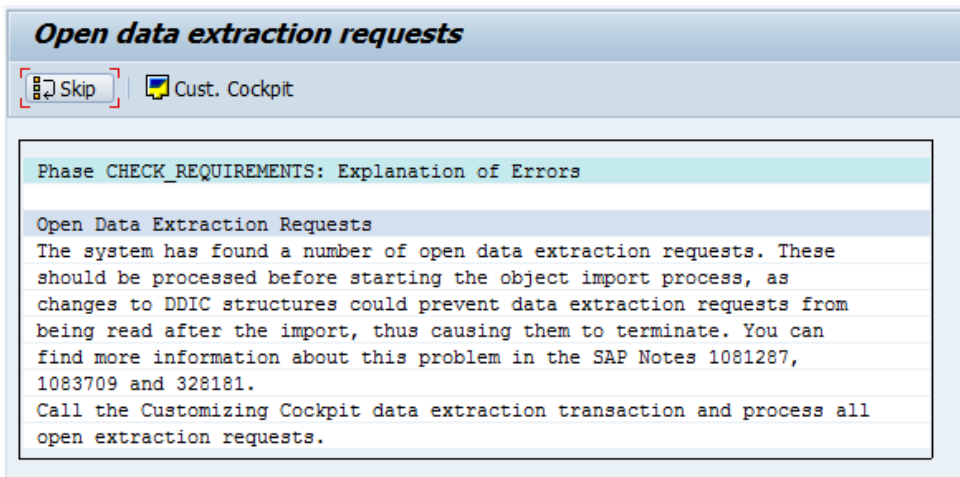

Click **Start options**.

Select **Start in background immediately** and click the **Green Tick Mark** to continue.

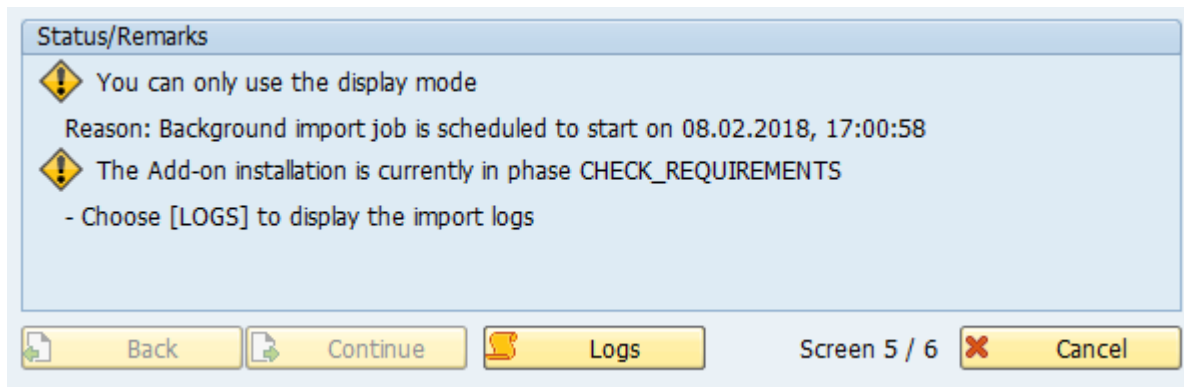

Click **Import** (Green Tick mark) to continue.

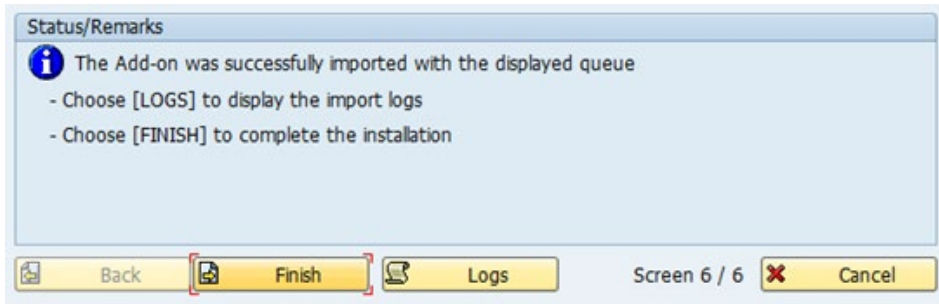

If this window appears, the add-on has independent unique namespace. Click **Skip**.

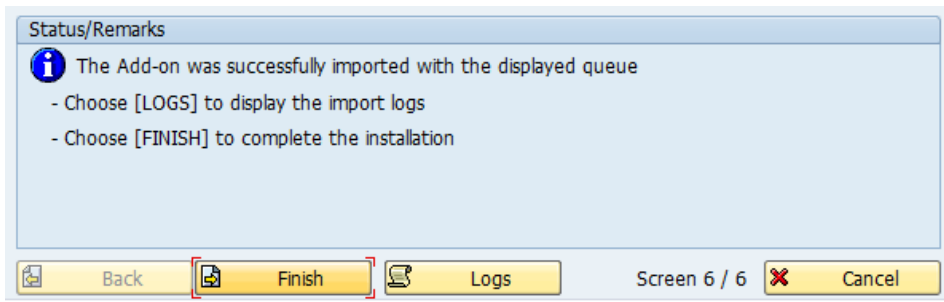

Click **Yes** to continue import.

Click **Refresh** until the import finishes.

When the installation/Upgrade finishes, see the Logs.

After you have checked the logs, go back to previous screen and click **Finish** to complete the process.
