Winshuttle, FM v20.2.8

Server-Side Uninstallation

Version 1.0

March, 2022

Prerequisites:-

- 1. Please read note 2011192 (Uninstalling ABAP Add-Ons) for general technical prerequisites.
- Ensure that you import the current SPAM/SAINT update (version 0053 or later for SAP NetWeaver 2004s). To confirm the version, compare the short text of the last imported SPAM/SAINT update (SAPKD*) with the short text of the SPAM/SAINT update in the SAP Service Marketplace. If the SAP Service Marketplace contains a more current version, import the new SPAM/SAINT update. For more information, see Note <u>19466</u>.
- 3. The transport tool tip has at least Version 380.07.22 and You use a kernel with at least Release 7.20. The transport tool R3trans has at least the version from AUG/06/2013.

Go to SAP transaction code SAINT

Click on Deinstallable components Tab

Select the WINSHTLQ add on from list

Click on Start
