CODE-1 Plus Maintenance Update

Version 5.0

CODE-1 Plus v5.0 Maintenance Release Notes

This CODE-1 Plus maintenance release contains the maintenance updates. If you need technical assistance, please contact the Precisely Support team at support@precisely.com.

> **Note:** This maintenance release is a full build release. If the 5.0 release has not yet been deployed, we highly recommend installing the maintenance release instead.

Contents:

What's New

CODE-1 Plus 5.0 maintenance release contains the changes listed below. If you need technical assistance, please contact the Precisely Support team at support@precisely.com.

> **Note:** This maintenance release is a full build release. If the 5.0 release has not yet been deployed, we highly recommend installing the maintenance release instead.

> **Note:** CODE-1 Plus was rebranded as a Precisely product as part of 4.3.1 release. All rebranded CODE-1 Plus documentation is available at **support.precisely.com/products/code-1-plus**.

Database Library required to be be added for IBMi customers

For IBMi customers, in addition to adding the global library and the product library to your CL, it is now required to add the database library for any jobs that execute our batch driver or the C1MATCHx callables. As an example:

ADDLIBLE LIB(G1@@PGMS)

ADDLIBLE LIB(G1C1PGMS)

ADDLIBLE LIB(G1C1FILES) <add the database library>

You will also add a RMVLIBLE in the CL that contains RMVLIBLE's for the global and product libraries.

New options required to be specified by IBMi customers

IBMi customers who have an RPG program calling C1MATCHx and using CRTBNDRPG when compiling, need to specify the following two options on the screen:

Default Activation Group : *NO

Activation Group: QILE

> **Note:** If these options are not set properly, errors such as an MCH1202 or an MCH0601 may occur.

Copybook changes

The P9AUDIT copybook length is increased to 1025.

Database Changes

There are no Database updates for this release.

Report Changes

This release contains no report changes.

Fixed Issues

Issues fixed in this release include:

Item Number	Description
CODEPLUS-5018	When the record is a street match and the NoStat Reason code is 06, CODE-1 Plus was returning the DPV Footnote of CC. It is being fixed and returned as C1.
CODEPLUS-5024	When the secondary is confirmed and the DPV Enhanced Return Code is D (Windows Platform), CODE-1 Plus was returning a DPV Return code of "D" with the Footnotes "AAN1". After being fixed, it now returns a DPV Return code of "Y" and "AABB" for the Footnotes.
CODEPLUS-5017	In cases where the DPV return code for R777/R779 carrier routes was D or S, CODE-1 Plus was not retuning the DPV footnote of R7. After the fix DPV footnote R7 is returned for DPV return code of S or D as well.
CODEPLUS-5036	For addresses where the DPV Return Code was S or D, CODE-1 Plus was returning a blank RDI flag. After the fix correct RDI flag is now being returned.

Item Number	Description
CODEPLUS-5020	Original Delivery Point vs Total DPS Delivery Point - CODE-1 Plus was calculating the TotalDPS in monthly production data. After the fix CODE-1 Plus returns the correct delivery point.

Documentation Updates

CODE-1 Plus documentation has been updated with the latest updates. Below are the updated documents for this release:

- Installation Guide
