| Address Fabric Version Compatibility | 5 |

Demographics

Demographics are descriptors of people and places. The demographic data described begins with people but is summarized at Census Block Group level.

Pitney Bowes U.S. GroundView® Demographic Data for the United States is a comprehensive set of over 8,200 variables. The same has been divided into multiple topics with few hundred variables for better consumption and analysis.

For reference, see the *U.S. Demographic & Business Summary Data Product Guide*. You can download the document in PDF format from here: [U.S. Demographic & Business Summary Data Product Guide](#).

Demographics Lookup

Demographics suite consists of an H2 database named `demographics_index`. This database contains `pbkey` linked to the `bkg_key`. This `bkg_key` in the `demographics_index` database can be looked up in the `demographics` attribute database using the `pbkey` field defined.

| Field Name | Field Type | Description |
|----------------------|------------------------|---|
| <code>pbkey</code> | <code>char (17)</code> | <code>pbKey™</code> unique identifier |
| <code>bkg_key</code> | <code>char (12)</code> | Unique value for demographics data records. |

Installation

1. Download your database(s). The database is downloaded as a `.tar.bz2` file.
2. Extract the `.tar.bz2` file.
3. Extract the `.tar` file.

Note: Consumer Expenditure Potential (CEP) data is provided into 4 bundles each for current year (cy) and five year forecasts (5y) expenditure. Refer [GroundView®: Consumer Expenditure Potential](#) for more details.

4. Copy the data to any directory. Note the file name and path.

Note: You may install databases on a mapped drive, but performance will be affected since you will be accessing them on a network rather than accessing them locally.

5. After you install the database files, you will need to define the database as a resource.

For more information, see "Adding a GeoEnrichment Module Database Resource" in the applicable version of the *GeoEnrichment Guide* at support.pb.com/spectrum.

Address Fabric Version Compatibility

These databases require Address Fabric October 2017 vintage.

The Address Fabric is based on November 2017 geocoding data.

2 - Data Layouts

In this section

GroundView®: Consumer Expenditure Potential

7

GroundView®: Consumer Expenditure Potential

Consumer Expenditure Potential (CEP) data is partitioned following the item hierarchical schema of the Current Employment Statistics (CES) - Bureau of Labor Statistics (BLS). For each CES survey, Pitney Bowes provides current year (designated in file name as cy) estimates and five year (denoted as 5y in zip file names) forecasts for all expenditures items provided by CES so long as the data is not missing or too small to yield valuable insight.

Consumer Expenditure Potential (CEP) data is provided into 4 bundles each for current year (cy) and five year forecasts (5y) expenditure:

Dataset #1

- Households
- Total Household Expenditures
- Food
- Alcoholic beverages

Dataset #2

- Households
- Total Household Expenditures
- Housing

Dataset #3

- Households
- Total Household Expenditures
- Apparel and services
- Transportation
- Healthcare

Dataset #4

- Households
- Total Household Expenditures
- Entertainment
- Personal care products and services
- Reading
- Education
- Tobacco products and smoking supplies
- Miscellaneous
- Cash contributions
- Personal insurance and pensions

Dataset 1: SAUS CEP1 CY Description

| Field Name | Field Type | Description |
