Demographics

Demographics are descriptors of people and places. The demographic data described begins with people but is summarized at Census Block Group level.

Pitney Bowes U.S. GroundView® Demographic Data for the United States is a comprehensive set of over 8,200 variables. The same has been divided into multiple topics with few hundred variables for better consumption and analysis.

For reference, see the *U.S. Demographic & Business Summary Data Product Guide*. You can download the document in PDF format from here: **U.S. Demographic & Business Summary Data Product Guide**.

Demographics Lookup

Demographics suite consists of an H2 database named demographics_index. This database contains pbkey linked to the bkg_key. This bkg_key in the demographics_index database can be looked up in the demographics attribute database using the pbkey field defined.

Field Name	Field Type	Description
pbkey	char (17)	pbKey™ unique identifier
bkg_key	char (12)	Unique value for demographics data records.

Installation

1. Download your database(s). The database is downloaded as a .tar.bz2 file.
2. Extract the .tar.bz2 file.
3. Extract the .tar file.

    Note: The content of the Household Income Data is provided into 4 bundles as data packages: Census 2010 (2k) dataset (groundview_household_income_2k), Five-year (5y) projections

dataset (groundview_household_income_5y), Selected data from the 5-year American Community Survey (ACS; 2008-2012) dataset (by) (groundview_household_income_by), and Current year (cy) estimates dataset (groundview_household_income_cy). Refer **GroundView®: Household Income** for more details.

4. Copy the data to any directory. Note the file name and path.

Note: You may install databases on a mapped drive, but performance will be affected since you will be accessing them on a network rather than accessing them locally.

5. After you install the database files, you will need to define the database as a resource.

For more information, see "Adding a GeoEnrichment Module Database Resource" in the applicable version of the *GeoEnrichment Guide* at **support.pb.com/spectrum**.

Address Fabric Version Compatibility

These databases require Address Fabric October 2017 vintage.

The Address Fabric is based on November 2017 geocoding data.
