1 - Introduction

In this section

Demographics

Demographics are descriptors of people and places. The demographic data described begins with people but is summarized at Census Block Group level.

Pitney Bowes U.S. GroundView® Demographic Data for the United States is a comprehensive set of over 8,200 variables. The same has been divided into multiple topics with few hundred variables for better consumption and analysis.

For reference, see the *U.S. Demographic & Business Summary Data Product Guide*. You can download the document in PDF format from here: **U.S. Demographic & Business Summary Data Product Guide**.

Demographics Lookup

Demographics suite consists of an H2 database named demographics_index. This database contains pbkey linked to the bkg_key. This bkg_key in the demographics_index database can be looked up in the demographics attribute database using the pbkey field defined.

Field Name	Field Type	Description
pbkey	char (17)	pbKey™ unique identifier
bkg_key	char (12)	Unique value for demographics data records.

Installation

1. Download the data zip to a directory on your computer.
2. Unzip the data, to find the base data zip with the documentation link file.
3. Unzip the base data folder to find the final .h2.db file.

> **Note:** For example, if you have downloaded the zip file with name **Groundview_Business_Summary_AK_H2DB201803.7z**, then you need to extract this file to find another zips named as **groundview_business_summary_naics_attribute.7z**,

groundview_business_summary_sic_dataset1_attribute.7z, and **groundview_business_summary_sic_dataset2_attribute.7z** with a documentation link file and an index file named as **demographics_index_AK.7z**. Finally extract any of the zip file such as, **groundview_business_summary_naics_attribute.7z** to find the **groundview_business_summary_naics_attribute.h2.db** as final data file.

4. Copy the data to any directory. Note the file name and path.

   Note: You may install databases on a mapped drive, but performance will be affected since you will be accessing them on a network rather than accessing them locally.

5. After you install the database files, you will need to define the database as a resource.

   For more information, see "Adding a GeoEnrichment Module Database Resource" in the applicable version of the *GeoEnrichment Guide* at **support.pb.com/spectrum**.

   After downloading data and installing the Spectrum Client you need to configure the GeoEnrichment Module in the Spectrum, for data processing. For that, follow the steps mentioned in the document available **here**.

Address Fabric Version Compatibility

These databases require Address Fabric January 2018 vintage.

The Address Fabric is based on January 2018 geocoding data.

GroundView®: Population by Race

Estimates of population characteristics such as the population distributions by age, sex, marital status, race, and Hispanic origin follow a similar top-down bottom-up process. At the block group unit of analysis, the latest and best information from the Census Bureau's American Community Survey (ACS) – the largest household survey in the US – is integrated with Census 2010 data to produce timely, accurate small-area estimates. Population characteristics are estimated using demographic estimation and projection models to achieve a preliminary set of estimates which are then reconciled to top-down estimates using iterative proportion fitting.

Population by Race dataset is provided into 3 bundles each for Census 2010 (2k), Five-year (5y) projections, Census 2010 dataset (by), and Current year (cy) estimates, and include different variables for different dataset bundle which are listed below:

Dataset #1

- Sex by Age (White Alone)

- Sex by Age (Black or African American Alone)

- Sex by Age (American Indian and Alaska Native Alone)

Dataset #2

- Sex by Age (Asian Alone)

- Sex by Age (Native Hawaiian and Other Pacific Islander Alone)

- Asian Alone with One Asian Category for Selected Groups

Dataset #3

- Sex by Age (Some Other Race Alone)

- Sex by Age (Two or More Races)

SAUS Race1 2K Description

Field Name	Field Type	Description
pbkey	char(12)	2017 Geography Layer Code
		Note: This field represents the Code value only but, it is named as a "pbkey" to support the Spectrum Platform while loading the data.

Field Name	Field Type	Description
race_ds1_2k_TYPE	char(4)	2017 Geography Type (represents Block Group (BG) only)
race_ds1_2k_whtpop2k	integer	2000 White alone
race_ds1_2k_whtp00042k	integer	2000 White alone: Under 5 years
race_ds1_2k_whtp05092k	integer	2000 White alone: 5 to 9 years
race_ds1_2k_whtp10142k	integer	2000 White alone: 10 to 14 years
race_ds1_2k_whtp15192k	integer	2000 White alone: 15 to 19 years
race_ds1_2k_whtp20242k	integer	2000 White alone: 20 to 24 years
race_ds1_2k_whtp25292k	integer	2000 White alone: 25 to 29 years
