Installation	2

What's New

Upgradation of Validate Address Global Library

(CDQE-66528) Upgrades **Validate Address Global** library to version 5.13.0.

Installation

To install this product update you must have Spectrum™ Technology Platform 12.2 installed.

Important: Before you install this product update, be sure that you have installed all previously-released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#) on support.pb.com/spectrum.

Applying this product update to a cluster

To apply this product update to a cluster, install the product update to each node by following the instructions in these release notes. You can apply the product update to one node at a time without stopping all the nodes in the cluster.

Installing on Windows

In this procedure, *SpectrumLocation* refers to the folder where you have installed the Spectrum™ Technology Platform server.

1. Stop the Spectrum™ Technology Platform server. To stop the server, right-click the Spectrum™ Technology Platform icon in the Windows system tray and select **Stop Spectrum™**. Alternatively, you can use the Windows Services control panel and stop the Pitney Bowes Spectrum™ Technology Platform service.
2. Back up this file to a different location:
SpectrumLocation/server/modules/addressglobal/lib
3. Delete this file:
SpectrumLocation/server/modules/addressglobal/lib/addressdoctor-5.12.0.jar

4. Download the zip file containing the patch from www.g1.com/support.
5. Extract the contents of the zip file to a temporary location.
6. Extract the resulting zip file (`cdq1220S02.zip`) to the folder where you installed Spectrum. For example, `C:\Program Files\Pitney Bowes\Spectrum`. Choose to overwrite the existing files.
7. Start the Spectrum™ Technology Platform server. To start the server, right-click the Spectrum™ Technology Platform icon in the Windows system tray and select **Start Server**. Alternatively, you can use the Windows Services control panel to start the Pitney Bowes Spectrum™ Technology Platform service.

Installing on Unix or Linux

In this procedure, *SpectrumLocation* refers to the directory where you have installed the Spectrum™ Technology Platform server.

1. Source the `SpectrumLocation/server/bin/setup` script.
2. Run the `SpectrumLocation/server/bin/server.stop` script to stop the Spectrum™ Technology Platform server.
3. Back up this file to a different location:
`SpectrumLocation/server/modules/addressglobal/lib`
4. Delete this file:
`SpectrumLocation/server/modules/addressglobal/lib/addressdoctor-5.12.0.jar`
5. Download the zip file containing the patch from www.g1.com/support and extract the contents to a temporary location.
6. FTP the `cdq1220S02.tar` file in binary mode to a temporary directory on the Spectrum™ Technology Platform machine.
7. Change directory to the `$G1DCG` directory.
8. Untar the file using this command:
`tar -xvf TemporaryDirectory/cdq1220S02.tar`
9. Run the `SpectrumLocation/server/bin/server.start` script to start the Spectrum™ Technology Platform server.
