Fixed Issues

This product update contains a software change that fixes the following issue in the Universal Addressing Module:

CDQE-99295 DefaultValidPostalCode field does not populate in 'write to file' .

Installation

To install this product update you must have Spectrum Technology Platform 2018.2 installed.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#).

Installing on Linux

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, `/home/user/myuser/SpectrumDirectory`).

1. Source the *SpectrumDirectory*/server/bin/setup script.
2. Run the *SpectrumDirectory*/server/bin/server.stop script to stop the Spectrum Technology Platform server.
3. Back up this file to a different location:
`<SpectrumLocation>/server/app/deploy/unc-18.2.console`
4. Extract the contents of the ZIP file to a temporary location.
5. FTP the `cdq20182o20.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
6. Change to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
7. Untar the file using this command: `tar -xvf TemporaryDirectory/cdq20182o20.tar`
8. On any machines that have Enterprise Designer installed, delete `WindowsTemporaryDirectory\glAssemblies`, where `WindowsTemporaryDirectory` is one

of the following: %TMP%, %TEMP%, %USERPROFILE%, or the Windows directory. Typically the path is: C:\Users\UserName\AppData\Local\Temp\glAssemblies

9. Run the *SpectrumDirectory/server/bin/server.start* script to start the Spectrum Technology Platform server.
