Fixed Issues.....	2
Installation.....	2

# Fixed Issues

## Issues

- While updating the H2DB data using the same Spectrum resource connection, a Spectrum restart was required to put the new data into effect.
- With this patch, a Spectrum restart will not be necessary for Database Resource update.

# Installation

To install this product update you must have Spectrum Technology Platform 18.2 installed.

**Important:** Before you install this product update, be sure that you have installed all previously-released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#) on [support.pb.com/spectrum](http://support.pb.com/spectrum).

### *Applying This Product Update to a Cluster*

To apply this product update to a cluster, install the product update to each node by following the instructions in these release notes. You can apply the product update to one node at a time without stopping all the nodes in the cluster.

## Installing on Windows

**Note:** In this procedure, *SpectrumDirectory* is the folder where you have installed the Spectrum Technology Platform server.

1. Stop the Spectrum Technology Platform server.

To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Spectrum™**.

2. Back up this file to a different location:

```
SpectrumDirectory\server\app\deploy\gem-18.2.car
```

3. Use the link in the release announcement to download the ZIP file containing the product update.
4. Extract the contents of the file to a temporary location.
5. Extract the contents of the ZIP file (`cdq20182s42.zip`) to the folder where you installed Spectrum.  
For example, `C:\Program Files\Pitney Bowes\Spectrum`.  
Choose to overwrite the existing files.
6. Start the Spectrum Technology Platform server.  
To start the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Start Spectrum™**.

## Installing on Unix or Linux

**Note:** In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server.

1. Source the `SpectrumDirectory/server/bin/setup` script.
2. Run the `SpectrumDirectory/server/bin/server.stop` script to stop the Spectrum Technology Platform server.
3. Back up this file to a different location:  
  

```
SpectrumDirectory/server/app/deploy/gem-18.2.car
```
4. Use the link in the release announcement to download the ZIP file containing the product update.
5. Extract the contents of the ZIP file to a temporary location.
6. FTP the `cdq20182s42.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
7. Change to the directory where Spectrum Technology Platform is installed.  
For example, `/home/user/myuser/PBSpectrum`.
8. Untar the file using this command:  
  

```
tar -xvf TemporaryDirectory/cdq20182s42.tar
```
9. Run the `SpectrumDirectory/server/bin/server.start` script to start the Spectrum Technology Platform server.
