Fixed Issue

This product update contains software changes that fix the following issue in Data Hub installed on the Spectrum Technology Platform:

- CDQE-87335** Updates the deprecated Geocoding service for Data Hub Visualization. The service is updated to use the Map Tile Layer on Precisely servers.

Installation

To install this product update you must have installed Data Hub on Spectrum Technology Platform 2018.2.0.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and platform, see the [Spectrum Technology Platform Updates](#) pages.

Installing on Windows

Note: In this procedure, *SpectrumFolder* is the folder where you have installed the Spectrum Technology Platform server (for example, C:\Program Files\Pitney Bowes\Spectrum).

1. Back up this file in the *SpectrumFolder*\server\app\deploy folder:

```
hub-visualization.war
```

2. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2018.2.0 Updates](#) page.
3. Extract the contents of the ZIP file to a temporary location.
4. Extract the contents of the resulting ZIP file (*cdq20182s45.zip*) to the folder where Spectrum is installed (*SpectrumFolder*).
Choose to overwrite the existing file.

Installing on Unix or Linux

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, `/home/user/myuser/PBSpectrum`).

1. Back up this file in the *SpectrumDirectory/server/app/deploy* directory:

```
hub-visualization.war
```

2. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2018.2.0 Updates](#) page.
3. Extract the contents of the ZIP file to a temporary location.
4. FTP the `cdq20182s45.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
5. Change to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
6. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20182s45.tar
```
