What's New

CDQE-88254

Upgrades the ICP engine to ICP187F01.

Fixed Issues

This product update contains software changes that fix the following issues:

CDQE-87556

Good addresses failing validation due to incomplete reference data.

CDQE-88572

Validate Mailing Address Premium multi-match returned where V4 is achievable (France).

Installation

To install this product update, you must have installed Spectrum Technology Platform 2018.2.0.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and platform, see the [Spectrum Technology Platform Updates](#) pages.

Installing on Windows

Note: In this procedure, *SpectrumFolder* is the folder where you have installed the Spectrum Technology Platform server (for example, `C:\Program Files\Precisely\Spectrum`).

1. Stop the Spectrum Technology Platform server.
To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Spectrum**.
2. Back up these files:

```
SpectrumFolder/server/modules/icp
```

3. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2018.2.0 Updates](#) page.
4. Extract the contents of the ZIP file to a temporary location.
5. Extract the contents of the resulting ZIP file (`cdq20182s46.zip`) to the folder where Spectrum is installed (*SpectrumFolder*).
Choose to overwrite the existing files.
6. Start the Spectrum Technology Platform server.
To start the server, right-click the Spectrum Technology Platform icon in the Windows system tray, and click **Start Spectrum**.

Installing on Linux

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, `/home/user/myuser/Spectrum`).

1. Source the *SpectrumFolder/server/bin/setup* script.
2. Run the *SpectrumFolder/server/bin/server.stop* script to stop the Spectrum Technology Platform server.
3. Back up these files to a different location:

```
SpectrumFolder/server/modules/icp
```

4. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software and release notes on the [2018.2.0 Updates](#) page.
5. Extract the contents of the ZIP file to a temporary location.
6. FTP the `cdq20182s46.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
7. Change to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
8. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20182s46.tar
```
9. Run the *SpectrumDirectory/server/bin/server.start* script to start the Spectrum Technology Platform server.
