Note: Clients will need to use the v10.0.0 of the GLOBAL ADDRESS VALIDATION - DOMESTIC USE and GLOBAL ADDRESS VALIDATION – NON-DOMESTIC USE data.

Installation

To install this product update you must have Spectrum Technology Platform 2020.1.0 installed.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#).

Installing on Windows

Follow these steps to install the Spectrum Technology Platform 2020.1.0 S64 patch in a Windows configuration.

Note: In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, `C:\Program Files\Precisely\Spectrum`).

1. Stop the Spectrum Technology Platform server.

To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Server**.

Alternatively, you can use the Windows Services control panel and stop the Spectrum Technology Platform service.

2. Back up the below file to a different location:

- `SpectrumDirectory\server\deploy`
- `SpectrumDirectory\server\modules`

3. Go to the directory `SpectrumDirectory\server\modules` and delete the folders labeled `GlobalAddressValidationUS` and `GlobalAddressValidation`.
4. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software, release notes, and checksum values on the [2020.1.0 Updates](#) page.
5. Extract the contents of the ZIP file to a temporary location.
6. Extract the contents of the resulting ZIP file (`cdq20201s64.zip`) to the directory where the Spectrum Technology Platform server is installed (*SpectrumDirectory*).
Choose to overwrite the existing files.

Installing on Linux

Follow these steps to install the Spectrum Technology Platform 2020.1.0 S64 patch in a Linux configuration.

Note: In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, `/home/user/myuser/Precisely/Spectrum`).

1. Source the `SpectrumDirectory/server/bin/setup` script.
2. Run the `SpectrumDirectory/server/bin/server.stop` script to stop the Spectrum Technology Platform server.
3. Back up the below file to a different location:
 - `SpectrumDirectory/server/deploy`
 - `SpectrumDirectory/server/modules`
4. Go to the directory `SpectrumDirectory/server/modules` and delete the folders labeled `GlobalAddressValidationUS` and `GlobalAddressValidation`.
5. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software, release notes, and checksum values on the [2020.1.0 Updates](#) page.
6. Extract the contents of the ZIP file to a temporary location.
7. FTP the `cdq20201s64.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
8. Change to the directory where the Spectrum Technology Platform server is installed (*SpectrumDirectory*).
9. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20201s64.tar
```
10. Run the `SpectrumDirectory/server/bin/server.start` script to start the Spectrum Technology Platform server.
