Fixed Issue.....	2
Installation.....	2

Fixed Issue

This product update contains a software change that fixes this issue in the Global Addressing Module.

CDQE-101668

Address validation errors were occurring in the Spectrum Global Addressing Module.

Installation

To install this product update you must have Spectrum Technology Platform 2020.1.0 installed.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#).

Installing on Windows

Follow these steps to install the Spectrum Technology Platform 2020.1.0 S69 patch in a Windows configuration.

Note: In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, C:\Program Files\Precisely\Spectrum).

1. Make sure that the Spectrum Technology Platform server is running.
2. Back up the following folder to a different location:

```
SpectrumDirectory\server\bin\
```

3. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software, release notes, and checksum values on the [2020.1.0 Updates](#) page.
4. Extract the contents of the ZIP file to a temporary location.
5. Extract the contents of the resulting ZIP file (`cdq20201s69.zip`) to the directory where the Spectrum Technology Platform server is installed (*SpectrumDirectory*). Choose to overwrite the existing files.

6. Open a command prompt and run the following command.

```
java -jar graphdb-crud-utility-20.1.jar
```
7. Refresh the Global Addressing Module in the Management Console.

Installing on Linux

Follow these steps to install the Spectrum Technology Platform 2020.1.0 S69 patch in a Linux configuration.

Note: In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, `/home/user/myuser/Precisely/Spectrum`).

1. Make sure that the Spectrum Technology Platform server is running.
2. Back up this folder to a different location:

```
SpectrumDirectory/server/bin/
```
3. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software, release notes, and checksum values on the [2020.1.0 Updates](#) page.
4. Extract the contents of the ZIP file to a temporary location.
5. FTP the `cdq20201s69.tar` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
6. Change to the directory where the Spectrum Technology Platform server is installed (*SpectrumDirectory*).
7. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20201s69.tar
```
8. Run this command.

```
java -jar graphdb-crud-utility-20.1.jar
```
9. Refresh the Global Addressing Module in the Management Console.
