Fixed Issues

CDQE-98028: This patch fixes security vulnerability (Apache Commons) for Spectrum Global Address Validation Module 2022.1.0.

Installation

To install this product update, you must have installed Spectrum Technology Platform 2022.1.0.

Important: Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the Product Update Summary.

Applying This Product Update to a Cluster

To apply this product update to a cluster you must stop all the nodes in the cluster then install the product update to each node by following the instructions in these release notes. You can start up each node after you update it.

Warning: You must shut down the cluster before installing this patch. Failure to do so may result in data loss and your system may become unusable

Installing on Windows

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, C:\Program Files\Precisely\SpectrumDirectory).

1. Stop the Spectrum Technology Platform server.

To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Server**.

Alternatively, you can use the Windows Services control panel and stop the Spectrum Technology Platform service.

2. Back up the below folder to a different location:

SpectrumDirectory\server\modules\GlobalAddressValidation\sdk

3. Delete the jar file `commons-text-1.9.jar` from the location:
SpectrumDirectory\server\modules\GlobalAddressValidation\sdk
4. Delete `WindowsTemporaryDirectory\glAssemblies` from machines that have Management Console, Enterprise Designer, or Interactive Driver installed, where `WindowsTemporaryDirectory` is one of the following: `%TMP%`, `%TEMP%`, `%USERPROFILE%`, or the Windows directory. Typically, the path is: `C:\Users\UserName\AppData\Local\Temp\glAssemblies`
5. Use the link in the release announcement to download the ZIP file containing the product update. You can also find links to software, release notes, and checksum values on the [2022.1.0 Updates](#) page.
6. Extract the contents of the resulting ZIP file (`cdq20221s09.zip`) to the directory where the Spectrum Technology Platform server is installed (*SpectrumDirectory*).
Choose to overwrite/add the existing file.
 - Verify the file/jar is copied from patch location:
`server\modules\GlobalAddressValidation\sdk` to
`SpectrumDirectory\server\modules\GlobalAddressValidation\sdk`
7. Start the Spectrum Technology Platform server.
To start the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Start Server**. Alternatively, you can use the Windows Services control panel to start the Spectrum Technology Platform service.

Installing on Linux

Note: In this procedure, *SpectrumDirectory* is the directory where you have installed the Spectrum Technology Platform server (for example, `/home/user/myuser/SpectrumDirectory`).

1. Source the `SpectrumDirectory/server/bin/setup` script.
2. Run the `SpectrumDirectory/server/bin/server.stop` script to stop the Spectrum Technology Platform server.
3. Use the link in the release announcement to download the ZIP file `cdq20221s09_Linux.zip` containing the product update
You can also find links to software and release notes on the [2022.1.0 Updates](#) page.
4. FTP the `cdq20221s09.tar.gz` file in binary mode to a temporary directory on the Spectrum Technology Platform machine.
5. Change directory to `$G1DCG` directory or to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
6. Untar the file using this command:

```
tar -xvf TemporaryDirectory/cdq20221s09.tar.gz
```

7. Back up the below folder to a different location:

```
SpectrumDirectory/server/modules/GlobalAddressValidation/sdk
```

8. Delete the jar file `commons-text-1.9.jar` from the location:

```
SpectrumDirectory/server/modules/GlobalAddressValidation/sdk
```

9. Copy the jar for the patch from the location:

```
server/modules/GlobalAddressValidation/sdk to
```

```
SpectrumDirectory/server/modules/GlobalAddressValidation/sdk
```

10. Run the `SpectrumDirectory/server/bin/server.start` script to start the Spectrum Technology Platform server.
