Installation.....	2

## Fixed Issues

This product update fixes the below issues:

**GEOAD-2832** Updated GeoStan version in EGM to the latest version.

## Installation

To install this product update you must have Spectrum Technology Platform 2022.1.0 installed.

**Important:** Before you install this product update, be sure that you have installed all previously released product updates for your modules and the platform. Unexpected issues may occur if you do not install product updates in the proper order. For a listing of product updates for each module and the platform, see the [Product Update Summary](#).

### *Applying This Product Update to a Cluster*

To apply this product update to a cluster you must stop all the nodes in the cluster then install the product update to each node by following the instructions in these release notes. You can start up each node after you update it.

**Warning:** You must shut down the cluster before installing this patch. Failure to do so may result in data loss and your system may become unusable

## Installing on Windows

Follow these steps to install the Spectrum Technology Platform 2022.1.0 S41 patch in a Windows configuration.

**Note:** In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, `C:\Program Files\Precisely\SpectrumDirectory`).

1. Stop the Spectrum Technology Platform server.  
To stop the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Stop Server**.

Alternatively, you can use the Windows Services control panel and stop the Spectrum Technology Platform service.

2. Back up the below folder to a different location :

`SpectrumDirectory\server\modules\geostan\lib`

3. Delete `WindowsTemporaryDirectory\glAssemblies` from machines that have Management Console, Enterprise Designer, or Interactive Driver installed, where `WindowsTemporaryDirectory` is one of the following: `%TMP%`, `%TEMP%`, `%USERPROFILE%`, or the Windows directory. Typically, the path is: `C:\Users\UserName\AppData\Local\Temp\glAssemblies`
4. Use the link in the release announcement to download the ZIP file `cdq20221s41_Windows.zip` containing the product update. You can also find links to software, release notes, and checksum values on the [2022.1.0 Updates](#) page.
5. Extract the contents of the resulting ZIP file `cdq20221s41_Windows.zip` to `TemporaryDirectory` and:

- Navigate to `SpectrumDirectory\server\modules\geostan\lib`
- Copy all the files/jars from the patch location.

Please make sure only single jar (`geostan-2024.00-api.jar`) file is present for Geostan, remove the older jar if present with older version.

6. Start the Spectrum Technology Platform server.

To start the server, right-click the Spectrum Technology Platform icon in the Windows system tray and click **Start Server**. Alternatively, you can use the Windows Services control panel to start the Spectrum Technology Platform service.

## Installing on Linux

Follow these steps to install the Spectrum Technology Platform 2022.1.0 S41 patch in a Linux configuration.

**Note:** In this procedure, *SpectrumDirectory* is the directory where the Spectrum Technology Platform server is installed (for example, `/home/user/myuser/Precisely/Spectrum`).

1. Source the `SpectrumDirectory/server/bin/setup` script.
2. Run the `SpectrumDirectory/server/bin/server.stop` script to stop the Spectrum Technology Platform server.
3. Use the link in the release announcement to download the ZIP file `cdq20221s41_Linux.zip` containing the product update  
You can also find links to software and release notes on the [2022.1.0 Updates](#) page.
4. FTP the `cdq20221s41.tar.gz` file in binary mode to a temporary directory on the Spectrum Technology Platform server machine.

5. Change directory to `$G1DCG` directory or to the directory where Spectrum Technology Platform is installed (*SpectrumDirectory*).
6. Untar the file using this command to the temporary directory:  

```
tar -xvf TemporaryDirectory/cdq20221s41.tar.gz
```
7. Back up this file to a different location:  

```
SpectrumDirectory/server/modules/geostan/lib
```
8. Copy all the files/jars from the patch location (where extracted in step 6)  

```
TemporaryDirectory/server/modules/geostan/lib
```

 to  

```
SpectrumDirectory/server/modules/geostan/lib
```
9. Please make sure earlier version of Geostan jar should not be present. Only latest jar (geostan-2024.00-api.jar) should be present and remove any older jars to avoid any conflict.
10. Run the `SpectrumDirectory/server/bin/server.start` script to start the Spectrum Technology Platform server.
